

Asmita Timala

Software Developer | Content Creator | Content Writer

Jyotinagar, Kapan, Kathmandu | asmitatimala04@gmail.com | [LinkedIn](#) | [Github Portfolio](#)

A Computer Science Graduate with the experience of working as a website development intern and DevOps training. Eager to be part of the technical community and contribute to the world with acquired skills and ideas. I consider myself a disciplined, hard-working, reliable, responsible and orderly person. I am looking for a role where I can further enhance my skills, learn and contribute to complex projects in a team environment.

AREAS OF EXPERTISE

Web Development: HTML, CSS, JavaScript, PHP, Python

Database Management: Basic DBMS using MySQL

Version Control: GitHub (Cloning/push/pull, branching, commits, collaboration)

PROJECTS

Chitto Order: This is a web-based system that allows customers to scan a QR code and access the menu directly in their browser without app installation. It enables order placement with quantity selection, remarks, and automatic total calculation, while providing staff an interface to manage orders efficiently such as editing orders or deleting them. Built using Flask, MySQL, HTML, JS and Tailwind CSS, it streamlines both customer experience and restaurant operations.

Optimizing Traffic Flow: A Simulation-Based Project on the Impact of Dedicated Motorcycle Lanes: This is a research-based, simulation project built using pygame. It explores how introducing dedicated motorcycle lanes could improve traffic efficiency in Kathmandu. Using traffic simulations, two scenarios were compared: the current shared-lane system and a proposed dedicated-lane system. The findings showed that dedicated motorcycle lanes increased average speeds, improved flow rates, reduced congestion, and minimized collision risks. The project highlights practical strategies for enhancing urban mobility and provides actionable recommendations for traffic planners and policymakers.

PROFESSIONAL EXPERIENCE

- Internship as web developer and manual Quality Assurance at Sarbottam Steels Ltd.

- 3 months of training on DevOps by NAS-IT

- Virtual internship on Digital Marketing at IIDE
- Additional Experience: Content Creation and Creative Writing (Works available on Wattpad)

LEADERSHIP & PROFESSIONAL DEVELOPMENT

- Aspire Leaders Program, Aspire Institute (2025)
 - Successfully completed Module 1: Personal and Professional Development (15 hours)
 - Completed 40-hour leadership development program
 - Covered personal and professional development, communication, critical thinking, and social impact

EDUCATION

Bachelors: ST. XAVIER'S COLLEGE, MAITIGHAR (2020-2025)

- Computer Science in Information Technology (BSC CSIT); recently completed.

SLC: St.Xavier's College, Maitighar with average GPA:3.59

SEE: National Pioneer Academy with average GPA:3.60

SOFT SKILLS

- Leadership, Teamwork, Problem Solving
- Cope with Challenge, meet the deadlines
- Proficient Communication Skills, Friendly
- Creativity
- Critical Thinking and Resilience
